

## **South Jersey Healthcare Kicks Off Recycling Program**

Noticing far too few containers inside of our campuses designated for recycling, a few employees voiced their concerns on this matter. Thanks to the help of these individuals, SJH will be starting a new recycling program in the upcoming weeks. Begin to take notice around the different campuses for the marked containers designated for recyclable goods. In 2006, SJH sent over 1,700 tons of trash to landfills. How many of those bags did we throw newspapers and bottles into that could have easily been recycled? If we all do our part, the SJH family will be able to make yet another positive difference in the community around us.

### **What can be recycled?**

*Non-medical glass bottles and jars*

*Aluminum cans*

*Aerosol cans*

*Corrugated cardboard*

*Plastic containers (with #1 or #2 on the bottom)*

*Newspaper*

*Magazines*

*Unwanted mail, catalogs and computer paper*
