

# South Jersey Healthcare Kicks Off Recycling Program

On July 1, 2007 you will begin to see recycling containers popping up in all of the different campuses. Last year SJH sent over 1,700 tons of trash to landfills. How many of those bags contained items that could have been easily recycled? If we all do our part, the SJH family will be able to make yet another positive difference in the community around us.

## What can be recycled?

Non-medical glass bottles and jars

Aluminum cans

Aerosol cans

Corrugated cardboard

Plastic containers (with #1 or #2 on the bottom)

Newspaper

Magazines

Unwanted mail and catalogs

Computer paper

South Jersey Healthcare

Changing Medicine. Changing Lives.
